WHY YOUR DENTAL TEAM RECOMMENDS
THE PROFESSIONAL CLEAN OF

Rotadent®

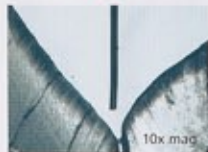

UNIQUELY DESIGNED
TO HELP YOU MAINTAIN
OPTIMAL ORAL HEALTH

Healthier teeth and gums with ENHANCED PLAQUE REMOVAL

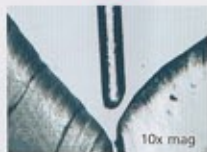

Plaque bacteria threatens your teeth, gums, restorative and cosmetic work, potentially even your overall health. The Rotadent rotary toothbrush attacks plaque with microfilaments that access hard-to-reach areas standard bristles may miss. It gently and effectively removes plaque and stains, controls gingivitis and reduces bleeding sites.*

MICROACCESS TECHNOLOGY reduces 92% of plaque in one minute

Rotadent works unlike any other toothbrush. It helps you achieve a professional clean with MicroAccess filaments that extend into interproximal areas. Rotadent's enhanced brush quality and unique movement "sweep" out harmful bacteria below the gum line and reaches areas that are difficult to clean or are easily missed.

Operates like a PROFESSIONAL INSTRUMENT with brush tips for your specific oral care

Whether you must protect your high-quality restorative and cosmetic dentistry, potentially even your overall health, or just show off a healthy smile, Rotadent performs like a professional instrument to help you maintain oral health and reduce recurring dental problems.

www.SmilesCreator.com

Rotadent is uniquely designed to help you reduce recurring dental problems and maintain optimal oral health

Cleans these difficult areas:

IN BETWEEN TEETH

Removes plaque and bacteria from locations you might ordinarily miss

ORTHODONTIC BRACES

Helps to eliminate decalcification or "white spots" that can form around brackets.* Protects against gingivitis

CROWNS & BRIDGES

Protects your investment in high-quality restorative and cosmetic dentistry by maintaining gum and bone

IMPLANTS

Works like a professional instrument to remove bacteria and plaque from places that are easily missed

Microfilaments reach areas that standard bristles may not be able to access, removing plaque and bacteria from areas that are easily missed*

- Clinically proven over a 10 year period to provide good to excellent plaque control and a reduction in tooth loss when compared to manual brushing techniques.²
- Fast, easy and effective cleaning every time you brush
- Reduces 92% of plaque in just a minute — twice as fast as a manual toothbrush³
- Full 360° sweeping action and MicroAccess filaments optimize cleaning efficiency in between teeth
- Available only through dental professionals
